Lábatlani Vasbetonipari Zrt. received award from E.ON

The Hungarian member of the PCM RAIL.ONE Group won the best suppliers certificate for its highest quality services and products. As a subsidiary of the PCM RAIL.ONE AG, Lábatlani Vasbetonipari Zrt. also produces concrete poles. The electric utility provider E.ON has recognized its suppliers for the ninth time in a row.

Neumarkt/ Lábatlan, March 14, 2017 – RAIL.ONE’s products and services meet the highest quality standards and are installed all around the world. The Hungarian subsidiary Lábatlani Vasbetonipari Zrt. has proved this self-conception again and won this year’s E.ON certificate for the best suppliers in the category “network materials”. Like E.ON, RAIL.ONE is committed to the Hungarian market. The company provides concrete poles and complements its portfolio with concrete sleepers and track systems for urban transit and long-distance rail transportation. “We are delighted to get this award from our client E.ON. We understand it as recognition for our efforts as well as motivation for the upcoming tasks to strengthen our quality and client services”, Károly Galler, CEO of Lábatlani Vasbetonipari Zrt. was happy to confirm.

Since 2009, E.ON has been honoring its suppliers with the “Supplier of the Year Award” for their outstanding performance. In addition to highest quality requirements, E.ON also focusses on reliability and innovation, which unifies both as partners with the equal self-conception. Dr Zoltán Béla Fekecs, the director of Procurement and Real Estate Management of E.ON said: “Our company’s goal is to create higher-level cooperation and take advantage of the possibilities provided by sharing knowledge. Today we are not only supplying energy but we provide comfort, safety and a greener future. We are looking for partners to help accomplish this goal and it is a pleasure for us that we have found the right partners”.
