RAIL.ONE launches new website

Fresh design and more information

Neumarkt, Germany, 22 September, 2014 – The RAIL.ONE Group has a smart new design at its well-known address www.railone.com. The internationally leading manufacturer of concrete sleepers and systems provider for railway tracks has thoroughly overhauled its website. Business partners can now find even more information on the Internet pages, improved menu navigation and new functions. In addition, the pages for mobile devices such as smartphones and tablets have been optimized.

Jochen Riepl, Chief Executive Manager of RAIL.ONE GmbH, is very satisfied with the layout of the new corporate website: "Just as we are a pioneer in matters of quality and innovation, our homepage also has to be attractive. In its design, scope and use, railone.com presents the company from a completely new side. And given that the company name stands for mobility, it was of course also important that we should be able to offer our customers an ideal surfing experience on their mobile end devices." RAIL.ONE is underscoring this ambition to achieve leadership in quality and innovation in all areas at the InnoTrans 2014, with a presentation of products and new developments. This year there is an emphasis on light rail traffic. The functions on the new website will be presented with an introductory video during the largest trade fair worldwide for transport technology.

Profile of RAIL.ONE GmbH:

RAIL.ONE GmbH conducts business with the goal of providing comprehensively oriented systems and engineering for the entire field of railway tracks and their many and varied requirements. With its patented RHEDA 2000® ballastless track system, the company has achieved an internationally leading position in the field of high-speed rail transportation. In addition, RAIL.ONE manufactures main-track and turnout sleepers made of concrete.

With more than 700 employees in its plants in Germany, Romania, Saudi Arabia, Spain, South Korea, Turkey, Hungary, and in the USA, RAIL.ONE has a total annual production capacity of 4.6 million main-track sleepers, as well as over 580,000 linear metres of turnout sleepers. The company achieves average annual sales of approximately €130 million.
