LONG-LASTING SUCCESS THROUGH SUSTAINABLE SOLUTIONS

After a four-year break, InnoTrans will open its doors in Berlin from 20.09.-23.09.2022. The Neumarkt-based manufacturer of concrete sleepers and rail track systems will once again participate at this important event for railway industry. In addition to the well-known and proven products, the RAILONE safety system ROSS will also be presented for the first time this year.

Neumarkt (Germany), Sept. 19, 2022 - On September 20, 2022, Messe Berlin will once again open its eyes and ears to the multifaceted rail infrastructure industry after a four-year break. With over 3,000 exhibitors from more than 60 countries in 2018, this trade fair offers an unparalleled stage for professional exchange.

The PCM RAILONE Group, which is itself represented in numerous countries around the world, is taking the opportunity to present its latest development: The RAILONE Safety System ROSS.

"At InnoTrans, we will be presenting our visitors with developments that we use to help upgrade the quality of track infrastructure and simplify construction logistics. To contribute to the important topic of tunnel safety we have developed a new drivability system that gives rescue vehicles easy access to the scene of an accident. At the same time, our ROSS safety system stands for easy installation and uncomplicated maintenance. For us, it is essential to identify the needs of our customers and to be able to quickly offer appropriate, economical and reliable solutions," says Jens Kleeberg, Chief Sales Officer of PCM RAILONE AG.

With flexibility and intensive research and development activities, RAILONE always responds to individual customer needs as well as to megatrends such as sustainability and safety.

With a two-story, 145-square-meter booth, RAILONE will be presenting solutions from all four business areas in Berlin: Long-distance and Freight Transport, Urban Transport, Plant Construction and Engineering. With the help of an interactive application, RAILONE will demonstrate product diversity, locations and international project references. Experts on site will be available throughout for interested parties to exchange information.

Facts and figures on the communication:

- InnoTrans in Berlin, September 20 – 23, 2022
- Booth 790 in Hall 26
- Presentation of a real exhibit as solutions to current challenges in the field of rail trafficability (RAILONE safety system ROSS)
- Interactive application shows products, references and further company information
